

## **WMB01 WebSphere Message Broker Application Development**

**Course description** This course is intended to provide a thorough grounding for WebSphere Application Developers. It discusses the objectives of **WebSphere Message Broker**, and provides the detailed instruction required to develop WebSphere Message Broker applications (message flows).

**Who Should Attend** Systems Integration and middleware developers responsible for developing WebSphere Message Broker applications

**Pre-Requisites** No previous WebSphere Message Broker knowledge is presumed, but a general familiarity with WebSphere MQ and with I.T systems and principles within your native operating platform(s) is assumed. Some programming background will be useful.

**Duration** 5 Days

**Detail To Follow**
